

## Team

### Developer - Genesis Real Estate Group

Genesis Real Estate Group was founded in 1987 with a single mission: to produce unique living environments at the best possible value through diligent design and tenacious control of the development process. Today, Genesis continues to maintain a high level of excellence in each property we develop, and successfully creates value in every market we enter.

A progressive, forward thinking builder, Genesis targets areas of strong demand with high barriers to entry, then works to deliver superior architectural design, rich amenity packages and a host of uniquely beneficial features. Our innovative formulas allow us to create upscale, yet affordable, communities that offer extraordinary lifestyles for savvy homebuyers. Genesis is able to achieve this feat by employing a seasoned team of developers, along with the finest consultants, as well as by using the most efficient and effective building materials and methodologies available.

In our industry, every action speaks for itself. In more than 20 years of business, Genesis has consistently built valued, trusted relationships that have withstood the test of time. From plumbers and granite suppliers to some of the world's largest financial institutions, Genesis unites honesty, loyalty and hard work to make sure we can stand behind our work and our word.

### Owner - Behringer Harvard Real Estate Investments
